

THE LEADER

Overview: Skills Program

“Leadership lifts people. Leadership lifts people from the life they have to the life they could have” - powerful words said by Dr John Maxwell, the founder of EQUIP (Equipping leaders to reach our world). Maxwell also said that “leadership is a process, not an event”.

The philosophy of the course is to become a strategic thinker, manager, motivator, team member, mentor and visionary at specific times and according to circumstances and to understand the difference. Individuals who want to be on a progressive career track toward establishing a leadership role in their organisations and their lives will benefit from the essential competencies developed in

this course. The course is designed to enable you to build on your existing personal and professional knowledge, understanding and skills in making the transition to leadership. You will explore and discuss different strategies and theories of leadership, identify the strengths and weaknesses of your own approaches to leadership and how these approaches will change as you progress through the program. Learners will understand the key role that developing and communicating vision plays in motivating others, and will develop an understanding of the skills needed for selecting, leading and developing teams.

Program Outline

This programme explains the concept of leadership and the difference between leadership and management. The leader will use creative and critical thinking processes and apply various leadership theories and techniques. The leader will be able to make the most of the following characteristics:

- Self-confidence;
- Ability to articulate vision;
- Strong convictions regarding vision;
- Behaviour that is out of the ordinary; and
- Perceived as being a change agent.
